**B**ravePoint surpasses all other consulting firms with highly evolved Progress™ expertise, perfected since 1987. We've written or customized applications and performed database administration for a wide range of businesses, from health insurance to airplane building and repair. In the process, we've encountered and solved every imaginable problem. So, when it comes to your Progress needs, BravePoint has the experience to craft superior, custom-built solutions. BravePoint goes beyond expert consulting, offering hands-on programming and analysis services, as well. Our accomplished developers apply years of practical experience to your specific needs, and they work on site or remotely, depending on your requirements.

**BRAVEPOINT**<sup>®</sup>  
Strength. Strategy. Stability.

## Expert Project Management

To produce long term solutions, BravePoint's experienced project management team analyzes and determines the business requirements that must be met in order to achieve your goals. We organize, coordinate and manage each element of the project to ensure success from start to finish.

## Extensive Progress™ Services

Regardless of the length of the engagement or the type of staffing required, BravePoint delivers the appropriate resources for your project. For example, BravePoint's renowned database administration and tuning experts are always on call to evaluate problems and determine the necessary actions to bring your system to top performance. In addition to database administration and tuning, BravePoint's Progress services include:

- ▼ Application design and development
- ▼ Application integration
- ▼ Project management
- ▼ Training
- ▼ Database migration assistance (upgrade V8 to V9; V9 to OE10)
- ▼ Database reorganization services
- ▼ Staff augmentation
- ▼ Telephone support
- ▼ Permanent placement

*Everyone in our organization feels like we got an amazing value from working with BravePoint.*
